

Unit-Specific Graduate Admissions Standards Instructions Proposal Format and Process

Words in bold indicate proposal sections.

Statement of the proposed unit-specific graduate admissions requirement.

New Catalog Text: Provide side by side listing of current text and proposed new catalog text regarding admission to the program.

Rationale for the proposed unit specific graduate admissions requirement. Proposals that request the elimination of the GRE or GMAT requirement need to include justification such as:

- these tests are not used in comparable programs across the country
- the unit has found that the tests are not reliable predictors of academic success of applicants and these tests are not typically used in comparative evaluations of programs in this discipline
- the emphasis of this program is at the doctoral level and that is where comparative program evaluation is made
- at this point in the development of the program at FIU other identified factors are more important than is a consideration of these test scores in admissions decisions and program comparisons

Exceptions to the standard unit-specific graduate admissions requirement including the circumstances under which the nationally-normed tests might provide valuable additional information on an applicant, and the conditions under which the tests may be required for a specific applicant; for example, when the academic record is poor and although the professional achievement is acceptable, it is not outstanding. Also, units that decide not to require nationally-normed tests for admission to Graduate School may require the tests for applicants who are also requesting appointment as a Graduate Assistant.

Approval steps begin with endorsement of the proposal by the faculty of the unit, by the unit dean, and by the Faculty Senate; approval by the Dean of the University Graduate School and by the Provost; and review, when necessary, by the Board of Trustees after which the new admissions criteria will be incorporated into appropriate official publications of the University.

Official publications of the University will note that at the graduate level, admissions requirements are minimums and even if those minimums are met, admission is not assured. Admission is competitive among all students meeting the minimum admission requirements for the number of available openings in the program and, at the doctoral level, the availability of faculty mentors.

Please submit the proposal with the attached cover page.
