

**Introduction to SAS Enterprise Guide for Students and Faculty
sponsored by Statistical Consulting**

March 25 Tuesday, 11-1 in GL266

Enterprise Guide is a point-and-click interface to the power of SAS software. It enables you to transparently access your data and explore and analyze it without having to write code.

This workshop will introduce you to Enterprise Guide and how it might be used to explore and analyze data. It will also address how to use the output to write reports and give presentations about your findings.

This will be a hands-on, follow along workshop. Workstations are limited. Please email paulette@fiu.edu to register.

Presenter

Jerry L. Oglesby holds a Ph.D. in Statistics from Texas A&M University. He currently works for SAS as the Director of Higher Education Consulting & Global Certification within the Education Division. This department is charged with supporting SAS in the academic community and SAS certification worldwide. It has, as one of its major goals, the introduction of SAS training materials, SAS certification, and software in the curriculums of courses across many units within the universities. Prior to starting this group, he was Director of Analytical Consulting within the Professional Services Division. As Director of Analytical Consulting he grew the Department from its formation to approximately forty modelers and business analysts whose primary function was to provide analytical support and expertise to SAS' sales force and customers.
